

## GMXH Disc Brake Caliper - Mechanically Applied, Lever Operated

Nominal Dimensions given

For caliper dimensions see DS2600

Dimensions in mm			
Caliper	A	B	C
GMXH 25	25	145.5	76
GMXH 30	30	147	77.5
GMXH 40	40	150.5	81

Weight (caliper and lever assembly) -  
10.62kg (lever assembly only) -

**Maximum Braking Force - 8.3kN @ 0.9kN force on lever**

The ratings shown on the above graph are based on fully bedded and conditioned brake pads with nominal friction coefficient  $\mu=0.4$ .

For bedding-in and conditioning procedures see Publication M1060.

Braking Force is defined as the Tangential Force acting on the brake disc at the Effective Disc Radius.

Braking Torque (Nm) = Braking Force (N) x Effective Disc Radius (m) where Effective Disc Radius = Actual Disc Radius - 0.06.

Twiflex Disc Brakes must be used with Twiflex asbestos free brake pads. The use of any other brake pads will invalidate the warranty. Twiflex Limited reserves the right to modify or change the design without prior notice.

# GMXH Disc Brake Caliper - Mechanically Applied, Lever Operated

**Lever Assembly Part Number 7800125**

## Lever Fitment

1. Offer lever to caliper making sure that both lock nuts are removed before placing push rod through caliper arm.
2. Fit lock nuts over the push rod and locate its end within the slot of the other arm.
3. Tighten one lock nut to 50-60 Nm then tighten the second nut against the first.
